**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-28 and 46, drawn to "a disbursement tracking system", classified in class 705, subclass 34.
  - II. Claims 29-40, drawn to "a data processing device, classified in class 705, subclass 1.
  - III. Claims 41-45, drawn to "a method for validating and controlling the transmission of document print information from a document creation device to an output device", classified in class 705, subclass 400.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions III and I do not require a redirector unit coupled to an input as claimed in invention II. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, and because these inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3627

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
